HVAC INDUSTRY Tapes

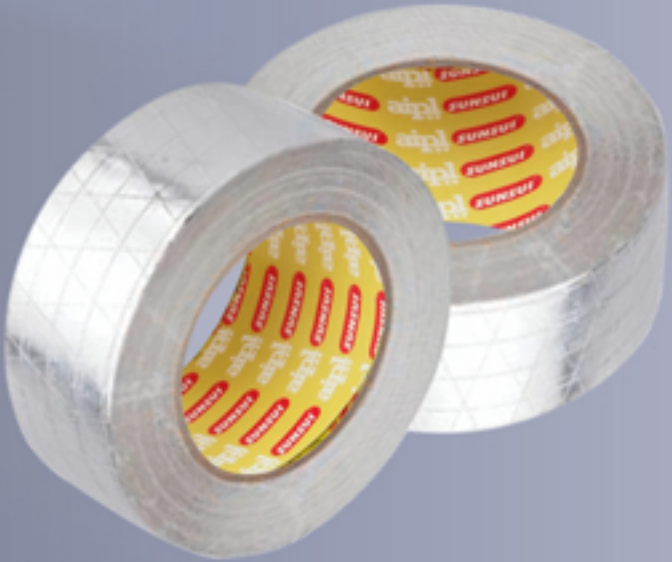

ALUMINIUM FOIL TAPES

- For general purpose seaming, patching and sealing.
- Highly Suitable for sealing off air conditioning and cool/warm air flow ducting.
- For sealing joints in ducting providing a flame retardant & vapor-proof barrier.
- Excellent adhesion on dry/clean surfaces on metal and other surfaces.
- These Foil Tapes can be applied for both high temperature/low temperatures.
- Sizes available from 25mm/50mm/75mm/100 mm in width to customized length.
- Available from 25 micron, 30 micron, 40 micron, 50 micron and 100 micron. in thickness.
- Product Application: - HVAC duct wrap, protective masking and electroplating.

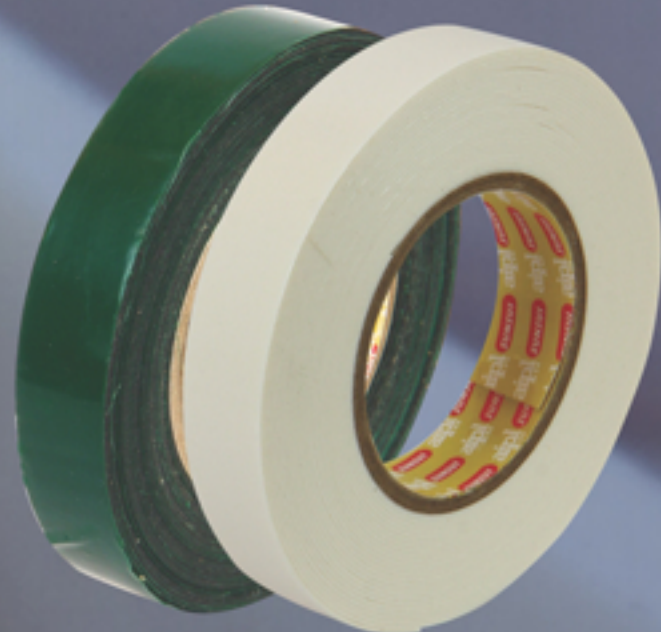

FSK FOIL TAPES

- FSK which stands for Foil Scrim Kraft is used as jacket facing for glass wool, rock wool, PU foam and other insulation to protect them against vapor moisture, in order to work more effectively.
- Use for sealing FSK duct board.
- Excels in demanding temperature and humidity applications.
- Long lasting adhesion on clean/dry surfaces.
- Full bond within 24 hours.
- With release paper.
- To seal joints in air conditioning industry requiring high strength.
- Products Application: - HVAC ducting purpose.

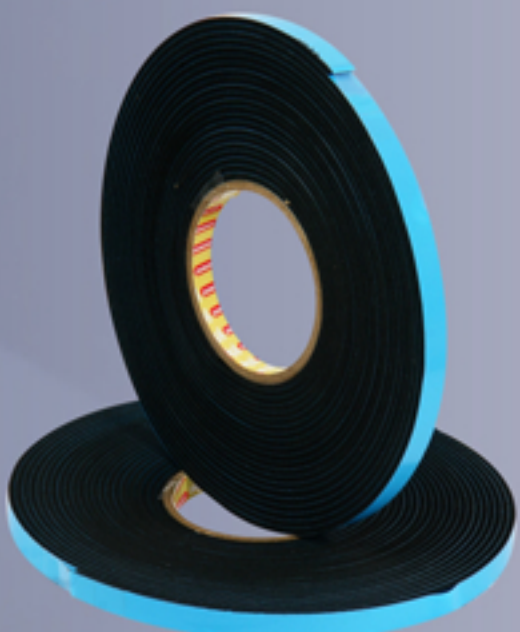

EVA FOAM TAPES

- Use for sealing, bonding, cushioning, protection from dust and mounting purpose.
- Protects from water, moisture and dust.
- Coated with variety of adhesives.
- Easy and quick to apply on different clean surfaces.
- Various sizes and die cuts available as per customize requirement.
- Great bonding strength with high adhesion and also heat resistance products available.
- Products application: - Permanent fixing of spare parts in refrigerator and other electronic goods and cars.

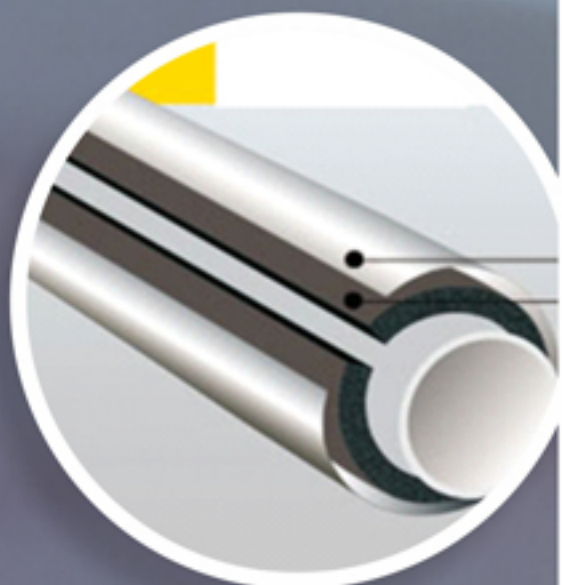

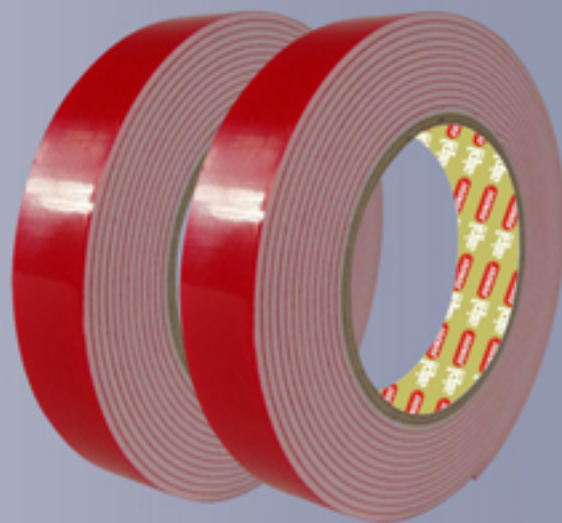

SPACER TAPES

- Specially used for aluminum doors, window, steel, aluminum surface and panel fixing.
- Highly suitable thermal insulation thus seals against water, vapor and noise.
- Technical foam coated with exclusive high grade acrylic adhesive to ensure excellent performance.
- Provides high bonding to both the surfaces.
- This tape comes with liner and made of EVA, PE foams.
- Its application replaces the uses of clips thus avoids labor cost.
- Products Application: - Highly suitable for structural glazing as a spacer.

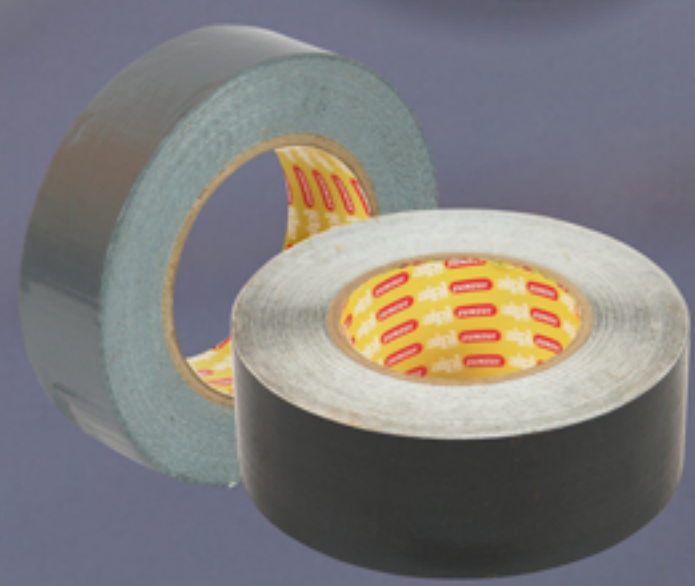

PE FOAM TAPE FOR HVAC JACKETING

- Duct wrapping as a good insulation material to protect heat and humidity.
- High elongation.
- Available in different sizes and thickness coated with strong acrylic adhesive to have high holding power and temperature resistance.

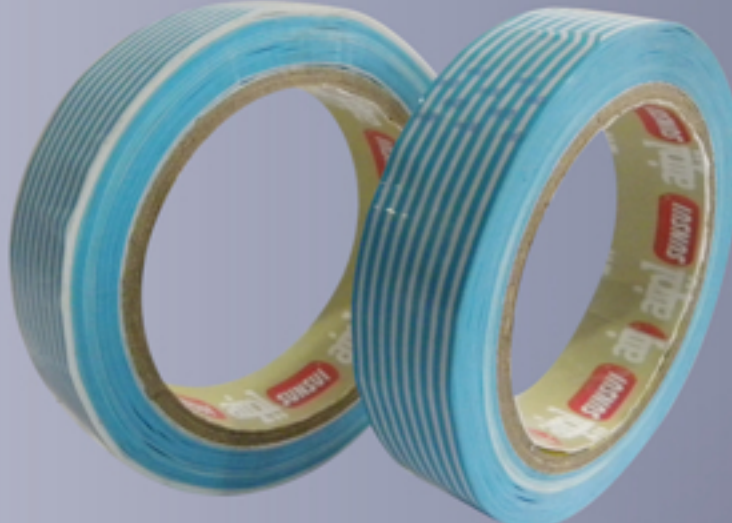

DUCT TAPES

- AIPL SUNSUI Duct tape is water proof PE coated fabric tape. It is used for holding, splicing, masking, patching, sealing and seaming purpose. Polyethylene coated cloth backing with rubber adhesive. It has High tack, conformability, strength and easy tear.
- It is good for heavy duty application
- It is water proof and used in construction industries for AC ducting.
- Available in silver color. Other colors are available against request.

HOLDING TAPES

- A special tape designed with polyester film coated with acrylic adhesive with residue free technology which provides excellent features, clean removal from the metal or plastic surface even after a long period of storage.
- Bluish color and transparent colors are available
- Other colors can be available on request.
- AIPL SUNSUI holding tape is specially designed for white goods industries for Door holding application at the time of transportation particularly refrigerator transportation and electronic goods etc.

BOPP BROWN / TRANSPARENT TAPES

- EZ-BOPP is Biaxially Oriented Polypropylene (BOPP) Film coated with water based adhesive.
- Brown, Transparent and other colors like red, green, blue, orange and black are available.
- General purpose usage.
